

## Changing one of the Fabric Studio Designs

### Changing Design Size:

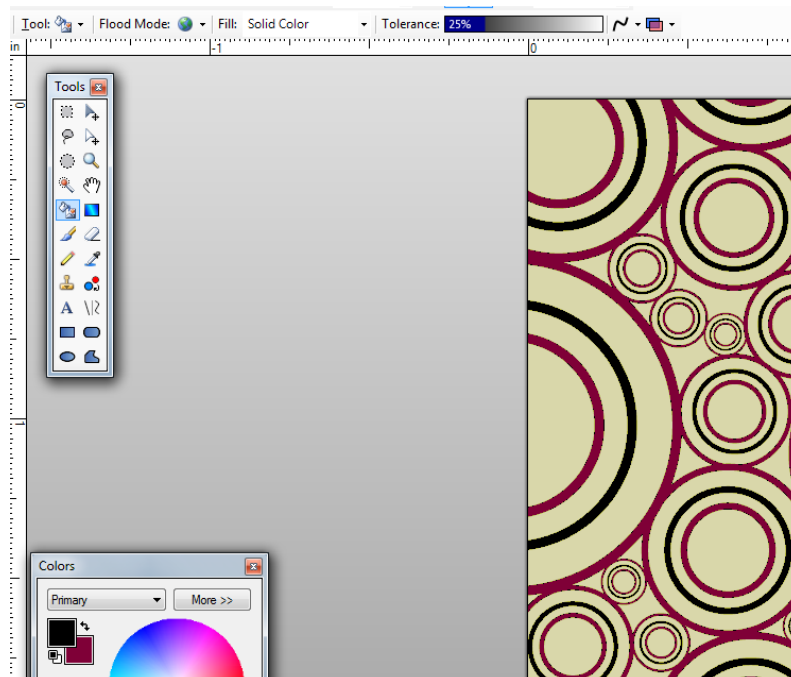

- **Image/Resize-Options:** Change through **Resolution** or **Print Size-Save** as a new image on computer before using in your project.

### Changing color of your Design Globally:

- **Select Paint Tool/ Flood Mode-Global/Tolerance**-will change based on how similar in tone your colors are. Move the bar towards 0% if colors are very similar. (Most of the time I leave the **Tolerance** at default which is **50%**.)

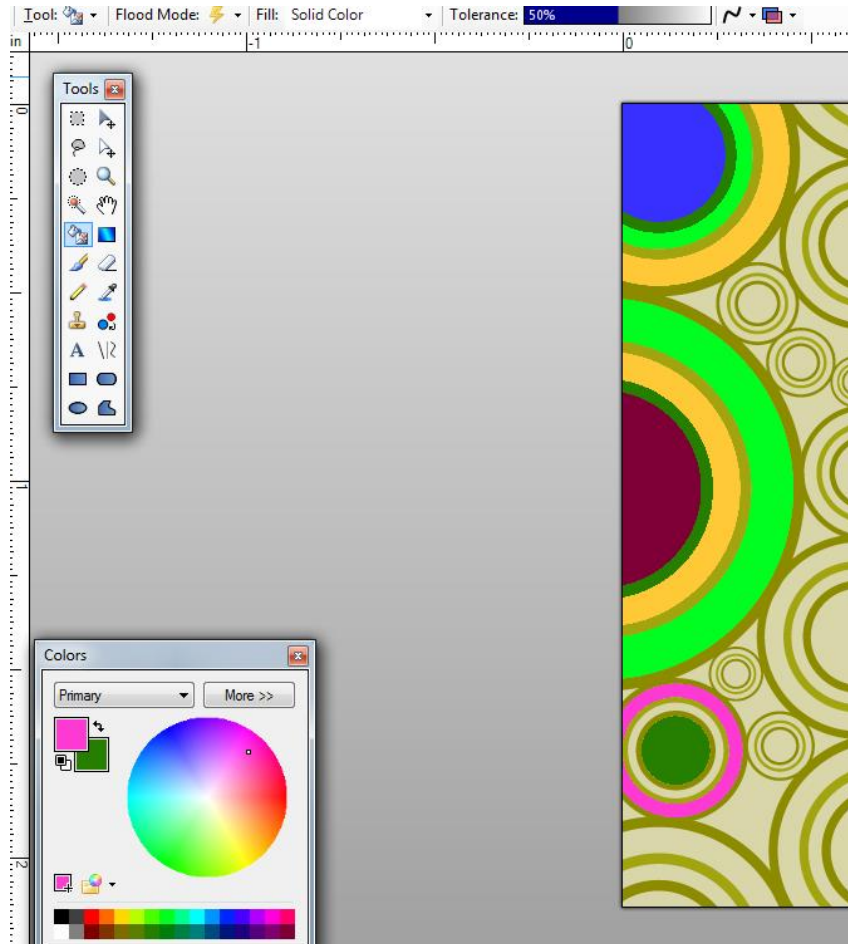

- **Select Colors in your Color Box/Click** on the area of your design you want to change and the **Paint Bucket** will fill in the color. Continue until your design is finished. **Save**/before using.

### Changing Color of your design one section at a time:

- Select Paint Buck Tool/ Flood Mode-Contiguous/Fill-Solid/Tolerance Bar will not be used.
- Select Colors in Color Box/Select area on design and Click/continue until design is complete then **Save** in new folder before using.

### Changing Color using the Fill Option:

- Select Paint Bucket Tool/Select Fill by pulling down tap next to **Solid Color/Select Fill/Select Primary/Second Colors from Color Box/Click** on area of design to fill. **Be careful to change back to Solid Color** once you are finished. Once your design is complete **Save** to a new folder before using.
